

[CAMERA BATTERIES]

Superior internal and external performance

Using advanced technology, ProMaster offers 200+ high quality and long lasting batteries

- + Rigorously tested to ensure battery longevity and performance
- + Guaranteed camera fit that matches the original manufacturer's design
- + Greater or equal capacity to the original manufacturer's battery capacity
- + Advanced circuitry for maximum battery life
- + Superior internal welding and manufacturing
- + Stronger adhesives and insulation to help prevent battery failure

Superior internal and external components:

- + Durable intercel strap with 4-point welding
- + Gold plated contacts
- + Additional NTC protection circuits
- + Added Polyswitch for additional protection

[CHARGERS]

Stay connected wherever you go

ProMaster offers charging solutions for virtually every battery on the market

Universal GO! Charger

CHARGE ANYWHERE, ANYTIME whether you're on the beach or in the air. The universal design allows you to charge virtually any lithium ion battery for digital cameras, camcorders, and cell phones with one charger. The Universal Go! Charger is power for your life on the go!

Internal Power Supply - Built in power supply lets you charge your digital camera battery UP TO 5 TIMES while providing extended run time to your USB device.

USB Power Port - Use to power and charge your compatible USB powered devices including cell phones, digital music players, tablets, and other devices.

LCD Fuel Gauge - The built-in fuel gauge shows the remaining charge of your battery or of the internal power source.

Universal Li-ion Charger

UNIVERSAL SOLUTION for multiple camera households or offices. The Universal Lithium Ion Charger makes it possible to charge virtually any lithium ion battery for digital cameras, camcorders, and cell phones with one charger.

Fast Charging - Charges most 3.6v-7.4v lithium ion batteries in 2 hours or less.

Dual Contacts - Easy and quick to adjust the connection for almost any battery.

Worldwide Power Compatibility - Multi-voltage circuitry accepts 110v-240 power supply.

LCD Fuel Gauge - LCD shows remaining battery capacity as well as charging process.

Traveler+ Charger

COMPACT AND LIGHTWEIGHT with no wires and no AC adapters. Just plug the Traveler+ Charger in and charge your lithium ion batteries for digital cameras and other USB powered devices.

Fast Charging - Charges most batteries in 2 hours or less.

USB Power Port - Use to power and charge your compatible USB powered devices including cell phones, digital music players, tablets, and other devices.

Worldwide Power Compatibility - Multi-voltage circuitry accepts 110v-240v AC or 12V-24V DC (optional DC power cord required) for true worldwide compatibility.
